

CAR & 4X4 SOLAR PANELS

Solar Panels for fixed mounting or portable use are available.

Our fixed panel mounting range from 10Watts to 160Watts. **Solar Panel Range**

The folding/portable range comes in 20, 40, 80, 120, 160 and 200Watts.

Folding Solar Panel Kits

All panels are of a high quality and our folding/portable range come with a regulator and battery leads already attached. (Ready to use straight from the box).

If you are purchasing a fixed solar panel, have a look at our accessories. You will find products to help with your installation. **Regulators Accessories**

Check out the **20W kit** this is a handy kit for around the home. It will help keep your batteries in top condition.

Attaching a solar panel to a vehicle is becoming more popular. This can be done by installing roof racks to you vehicle like the photos shown below. A waterproof regulator can be attached to the rear of the panel or a non-waterproof, standard or LCD regulator can be mounted inside the vehicle. The panel is then able to be used to charge an auxiliary battery or the start battery or even both. This is a great idea if you use a fridge in your vehicle.

For more information about each product have a look at the specifications on each product's page.
